

Phone Book Dictionary

Design a phonebook dictionary that on the input of any characters gives names and phone numbers of all the matching terms (prefixes)

For instance

Rihana 233222232

Ricky 134242444

Peter 224323423

Ron 988232323

If you give R as input it should list

Rihana Ricky and Ron with their contact numbers

Added Features

1) Ability To Create|Update|Delete phone entries

2) Bulk Upload For Create|Update|Delete phone entries

Programming Stack To Use

FrontEnd

React Js

BackEnd

Nodejs

Express

MongoDb

PS:

You don't need to implement authentication or authorization.
